The Office of Academic Clinical Affairs is proud to launch the third year of our interprofessional internship program. We invite applications for an internship position during the 2022-2023 academic year. Selected students will be partnered on an interprofessional intern team with a partner organization to engage in a project focused on advancing health and education.

Interns must be enrolled in any University of Minnesota degree-seeking program and have an interest in health care systems and interprofessional practice and/or education. Internships will occur over the course of one academic year (October through May) and will average 5 paid hours/week. Selected interns will benefit from health care system exposure, mentorship, leadership development, and engagement with the Office of Academic Clinical Affairs and broader interprofessional efforts.

Applications will be accepted Aug. 15 - Sep. 12, 2022
